BÀI TẬP NGÀY 24/03/2026 - LẬP TRÌNH MẠNG

Bài 1: Đóng gói dữ liệu (info_server.c và info_client.c)

The screenshot shows a VS Code editor with a terminal window and a PowerShell window. The terminal window displays the output of the `./info_server` command, which lists various files and their sizes. The PowerShell window shows the execution of `wsl` and `cd` commands, followed by the execution of `./info_client` which outputs the IP address 127.0.0.1 and port 9000.

```
nbl@LAPTOP-72CTQ1VN: ~/$ cd projects
nbl@LAPTOP-72CTQ1VN:~/projects$ ./info_server 9000
Client connected!
bai4.c                574 bytes
tcp_client.c          1306 bytes
bai1.c                774 bytes
sv_server             25648 bytes
sv_client.c           1977 bytes
sv_client             24744 bytes
dona                  22224 bytes
server1.c             1688 bytes
sv_server.c           2461 bytes
tcp_server.c          2447 bytes
server2.c             182 bytes
bai1                  17456 bytes
